**Discrimination pin for size 16 cavities**

In applications where similar connectors are used next to each other, mismatching can be a reason for disturbances, system failure or even danger to operating personnel. To eliminate mismatching, all TRIM TRIO® connectors can be equipped with discrimination keys, which offer unlimited possibilities for a «fool-proof» interconnection system.

When one of these discrimination keys is used, the TRIM TRIO® connector will only mate with a connector which has a vacant contact or discrimination cavity at the corresponding position.

This system offers boundless opportunities for all applications which involve several identical TRIM TRIO® connectors.

**The material used is Thermoplastic.**

**SMSPKEO**  
A dummy contact, which can be inserted into an empty contact cavity in any of the TRIM TRIO® connectors.
